

Amendments to the Specification:

Please replace the title (54) with the following title:

(54) User-Supported Dual Display System

Please add the following new paragraph after paragraph [0026]:

[0026.1] Figure 3 illustrates a known prior art system of an invention where the activation means of this invention is illustrated.

Please add the following new paragraph after paragraph [0028]:

[0028.1] Figure 3 illustrates a prior art system 302 where only one head-mounted display 310 (like 102 in Figure 1) is shown where the microphone 322 is intended to include eye-tracking means or electroencephalography (EEG) which can easily be used by those skilled in the art. The other prior art features of Figure 3 relevant to the present invention are:

312 display adjustable arm

314 cable connecting the HMD display 310 with the computer 302

306 computer includes system unit 306

308 display HMD headband

322 microphone

324 cable

326 cable

318 cable

316 instrument pack

320 a test device

304 strap or belt to hold computer 302

In the present invention a wrist display 103 or a second display to HMD 310 and 102 is used as the primary display while the head-mounted display 310 (or 102) is limited to functionality to displaying a minimal amount of data.
